

SHOWCASE

INVESTEC BANK – JOHANNESBURG, SOUTH AFRICA

Since its foundation 1974 in Johannesburg, the continuously growing Investec Bank enjoys an excellent international reputation, employing over 6000 people worldwide.

On the occasion of its 34th anniversary, Traxon and e:cue's lighting and control solutions created a unique dynamic lighting show by using the 64PXL Mirror Panel. The Mirror Panels (55,296 DMX channels) are installed into the building's stairways with a total of 288 devices and create an outstanding ambience of light. A stylish dark glass mirror displays up to 24 different lighting scenarios, enriching the hall with bright and vibrant colors.

The lighting show is controlled by e:cue's Butler and Media Engine 2 which is a state-of-the-Art replay unit with the preinstalled Software LAS.

Traxon and e:cue's perfect product match offers the visitors a unique dynamic lighting show.
